Learning Objectives

- Understand Microsoft Entra ID
- Create, configure, and manage identities
- Lab 01 - Manage Microsoft Entra ID Identities

Delos
Arvato
+ SAP

Understand Microsoft Entra ID

Learning Objective – Understand Microsoft Entra ID

- Examine Microsoft Entra ID
- Describe Microsoft Entra ID Concepts
- Compare Microsoft Entra ID to Active Directory Domain Services
- Compare Microsoft Entra ID P1 and P2 plans
- Implement Self-Service Password Reset
- Learning Recap

Exam objectives

Manage Microsoft Entra ID users and groups

- Configure self-service password reset (SSPR)

Examine Microsoft Entra ID

- Configure access to applications, including single sign-on
- Manage and provision users and groups
- Providing an identity management solution, including federation
- Implement security features like multi-factor authentication and conditional access

Describe Microsoft Entra ID Concepts

Concept	Description
Identity	An object that can be authenticated
Account	An identity that has data associated with it
Microsoft Entra ID account	An identity created through Microsoft Entra ID or another Microsoft cloud service
Tenant/directory	A dedicated and trusted instance. A tenant is automatically created when your organization signs up for a Microsoft cloud service subscription. • Additional instances can be created • Microsoft Entra ID is the underlying product providing the identity service • The term <i>Tenant</i> means a single instance representing a single organization • The terms <i>Tenant</i> and <i>Directory</i> are often used interchangeably
Azure subscription	Used to pay for Azure cloud services

DC

Compare Microsoft Entra ID to Active Directory Domain Services

Microsoft Entra ID is primarily an identity solution

Queried using the REST API over HTTP and HTTPS

Uses HTTP and HTTPS protocols such as SAML, WS-Federation, and OpenID Connect for authentication (and OAuth for authorization)

Includes federation services, and many third-party services (such as Facebook)

Microsoft Entra ID users and groups are created in a flat structure, and there are no Organizational Units (OUs) or Group Policy Objects (GPOs)

Compare Microsoft Entra ID plans

Feature	Free	Microsoft ID P1	Microsoft ID P2	Microsoft Entra Suite
Single Sign-On (unlimited)	✓	✓	✓	
Cloud and Federated authentication	✓	✓	✓	
Advanced group management		✓	✓	
Self-service account management portal	✓	✓	✓	
Multifactor authentication (MFA)	✓	✓	✓	
Conditional access		✓	✓	
Risk-based Conditional Access (sign-in risk, user risk)			✓	✓
Automated user and group provisioning to apps		✓	✓	✓
Privileged identity management (PIM)			✓	✓
Advanced identity governance				✓

What is self-service password reset in Microsoft Entra ID?

1. Determine who can use self-service password reset
2. Choose the number of authentication methods required and the methods available (email, phone, questions)
3. You can require users to register for SSPR (same process as MFA)

The screenshot shows the 'Password reset - Authentication methods' configuration page in the Microsoft Entra ID admin center. The left-hand navigation pane is visible, with the following sections and items:

- Manage**
 - 1 Properties
 - 2 Authentication methods (highlighted)
 - 3 Registration
 - Notifications
 - Customization
 - On-premises integration
- Activity**
 - Audit logs
 - Usage & insights
- Troubleshooting + Support**
 - New support request

The main content area on the right is titled 'Password reset - Authentication methods' and includes a 'mitanic (Default Directory)' label. It features a 'Save' button and a 'Discard' button. The configuration options are as follows:

- Number of methods required to reset:** A dropdown menu with '1' selected and '2' as an alternative.
- Methods available to users:** A list of checkboxes for selecting authentication methods:
 - Mobile app notification (unchecked)
 - Mobile app code (unchecked)
 - Email (checked)
 - Mobile phone (checked)
 - Office phone (unchecked)
 - Security questions (checked)
- Number of questions required to register:** A dropdown menu with '5' selected and '3' and '4' as alternatives.
- Number of questions required to reset:** A dropdown menu with '3' selected and '4' and '5' as alternatives.
- Select security questions:** A section indicating '5 security questions selected'.

Create, configure, and manage identities

Learning Objectives - User and Group Accounts

- Create User Accounts
- Manage User Accounts
- Create Group Accounts
- Assign Licenses to Users and Groups
Demonstration – Users and Groups
- Summary and Resources

Exam objectives

Manage Microsoft Entra ID users and groups

- Create users and groups
- Manage user and group properties
- Manage external users
- Manage licenses in Microsoft Entra ID

Create User Accounts

 **Users** | All users

Microsoft

 All users

 Deleted users

 Password reset

 User settings

 Diagnose and solve problems

 Reset password

 Multi-Factor Authentication

 Delete user

Name	User principal name	↑↓	User type	Directory synced
 Retail Crisis Notifications	 @microsoft.com		Member	Yes
 Rumon Sinha	 @microsoft.onmicrosoft.com		Guest	No
 Momir Radojkovic	 @microsoft.onmicrosoft.com		Guest	No
 Mika Robertson	 @microsoft.onmicrosoft.com		Member	No

- All users must have an account
- The account is used for authentication and authorization
- Each user account has additional properties

Manage User Accounts

+ New user + New guest user ↑ Bulk create ↑ Bulk invite ↑ Bulk delete ↓ Download users ↻ Refresh 🔑 Reset password 🔗 Multi-Factor Authentication ...

New user

Microsoft

Create user

Member

Create a new user in your organization.
This user will have a user name like
alice@Microsoft.onmicrosoft.com.

[I want to create users in bulk](#)

Invite user

Guest

Invite a new guest user to collaborate with
your organization. The user will be emailed
an invitation they can accept in order to
begin collaborating.

[I want to invite guest users in bulk](#)

- Must be Global Administrator or User Administrator to manage users
- User profile (picture, job, contact info) is optional
- Deleted users can be restored for 30 days
- Sign in and audit log information is available

Create Group Accounts

 Search groups

	Name	Group Type	Membership Type
☐	 Managers	Security	Assigned
☐	 Virtual Machine Administrators	Security	Assigned
☐	 Virtual Network Administrators	Security	Assigned

Group Types

- Security groups
- Microsoft 365 groups

Membership Types

- Assigned 
- Dynamic User
- Dynamic Device (Security groups only)

Assign Licenses to Users and Groups

Azure is a cloud service that provides many built-in services for free.

- Microsoft Entra ID comes as a free service
- Gain additional functionality with a P1 or P2 license

Additional Services (like O365 are paid cloud services)

- Microsoft paid cloud services require licenses
- Licenses are assigned to those who need access to the services
- Each user or group requires a separate paid license
- Administrators use the Microsoft 365 Admin portal and Microsoft Graph PowerShell cmdlets to manage licenses

- ☐ View license plans and plan details
- ☐ Set the Usage Location parameter
- ☐ Assign licenses to users and groups
- ☐ Change license plans for users and groups
- ☐ Remove a license
